# 1 Project outline

You have already worked with virtualization and virtual machines.

Rough outline of the 5 weeks

- Week 1: Start project, form groups, get access, built an overview, decide on a HLD.
- Week 2: Initial setup
- Week 3:
- Week 4:
- Week 5:

## 1.1 Mandatory elements

### 1.1.1 All weeks will include presentations on class.

This is a presentation with the class as *audience* and you must have decided in advance the *purpose* of the presentation

### 1.1.2 Project management

You will create a gitlab project for project management and for configurations.

Remember til invite the teachers.

### 1.1.3 All weeks will include a meeting with the teacher(s)

This is a 10-15 minute meeting, where you present status on tasks and milestones, and if you have specific questions
